

Drum Mount Fogger

Industrial fogging machine for larger areas

- Commercial duty fogging machine
- Suitable for large areas
- Manual or timer controls
- Mounts to a variety of chemical drums
- Suitable for oil or water based solutions

The Commander Drum Mount Fogger (672DM) is designed for industrial users, providing a cost effective and reliable solution when treating large areas for a long period of time. Compatible with a wide range of drum sizes, it is ideal for large-scale insect control.

The 672 Drum Mount fogger can be controlled by hand or on a timer and as liquid is drawn from the chemical drum, it can operate with little attention. Its one-turn control valve enables output up to 300ml/min, with particle size ranging from 15-30 microns (intermediate fog to heavy wet fog). Higher flows produce larger droplets.

This “cold fogger” can be used with oil and water based solutions, It uses shear turbulence to create a tornado effect at the nozzle, enabling the fog to reach distances of up to 9 metres.

Typically supplied to warehouses, food processing plants.

Constructed from aluminium, with fuel and oil resistant vinyl tubing, a celcon nozzle and brass control valve / fittings.

Technical data: Drum Mount Fogger 672

| Drum Mount Fogger Features: | 672DM |
|------------------------------------|--------------------------------------|
| Motor | 240 / 110v |
| Particle size (micron) | 15-30 (adjustable) |
| Suitable chemicals | Water and Oil based |
| Liquid flow rate (ml/min) | 0-300 (adjustable) |
| Drum mounting | Standard 2" NPT – adaptors available |
| Dimensions L x W x H (mm) | 320x220x390 |
