

i-gum Chewing Gum Removal Machine

Battery powered, use as a backpack or trolley

- I-remove portable chewing gum removal machine
- Evaporates gum in 6 seconds
- Also removes glue and other sticky substances
- Battery powered steam cleaner
- Easy, accessible, operator controls
- Can be used indoors or out
- Works on all types of surface

The i-gum chewing gum removal machine (/ i-remove) is lightweight and extremely portable. Designed to be used as a comfortable backpack machine, or a wheeled trolley, the i-mop allows for a complete range of movement and operator comfort. The unit is attached to an ergonomic lance designed for fast, reliable and easy operation with maximum chewing gum removal.

At the point of contact, the specially designed brush emits a pH neutral and safe enzyme steam mixture to dissolve the chewing gum, which can then be brushed completely away.

Operator controls are located in the head of the machine, in easy reach.

The i-gum can be used indoors or out, and in different environments, as it generates no heat or hazardous fumes in use and it can also be used to remove other sticky materials, e.g. stickers and glue.

The i-gum B (i-remove B) is powered by the i-power battery system and gives up to 50 minutes' run time from one battery charge.

No water or power supply is required to operate the machine. The efficient heating element of the lance, when used with pre-diluted detergent uses just the correct amount of detergent.

Technical data: i-gum / i-remove Chewing Gum removal machine

Features:	i-gum B
Power source	i-power 9: 24 V, 8.8 Ah i-power 14: 25.2 V, 14 Ah
Charger type	Off-board
Tank capacity	2.5 Litres
Lance weight	1.1 Kg
Hose length	80cm / 150cm
Run time	40 – 100 minutes
Max steam temperature	104 °C
Weight	9.4 Kg
Dimensions (L x W x H) (mm)	347 x 330 x 500 (1127 with lance)
