Nilfisk SW4000 Sweeper

One-touch industrial floor sweeper

- Ride-on floor sweeper
- Hydraulic high dump & retractable hopper
- Easy “no tools” maintenance
- Ergonomically designed for operator comfort
- Minimised energy consumption and low noise level
- Retractable, spring-loaded side booms
- Optional DustGuard ™ misting system

The Nilfisk SW4000 battery, petrol or LPG powered operated ride-on floor sweeper with hydraulic high dump function. Designed for high performance, reliability, minimal downtime and low operating costs, it is ideally suited for industrial and manufacturing use, as well as in distribution centres, shopping malls, car parks and sports centres. This machine is also environmentally friendly, with low energy consumption, recyclable materials, dust control and low noise levels.

The SW4000’s One Touch Sweeping feature makes it easy, economical and safe to operate, with all functions activated and terminated simultaneously, so that components are running unnecessarily when the sweeper is still.

No tools are required for broom and filter removal and the SW4000 offers easy access to all components, for fast maintenance and service. The side brooms have no belts which can break or require changing, making this machine economical to run. The retractable hopper can be closed from the operator compartment, enabling the operator to drive away immediately after emptying into a skip or bin. The retractable, spring loaded side brooms, spring away on impact, which means that they do not break or damage any obstacles they touch

An electrical time Liberator™ multi-frequency filter shaker cleans the filter efficiently even in dusty applications and an optional DustGuard™ misting system is also available.

Technical data: Nilfisk SW4000 Floor Sweeper

Features:	SW4000 B	SW4000 P	SW4000
